

GHANSHAM GAVANDE

Creative Developer | Full-Stack & AI Engineer

☎ +91-7020601321 ✉ ghanshamgavande49@gmail.com 🔗 linkedin.com/in/ghansham-gavande 🌐 [Portfolio](#) 🐙 [GitHub](#)

Summary

Creative full-stack developer with hands-on experience in MERN stack development, AI agent engineering, and data-driven automation. Proficient in modern AI vibe coding tools (Lovable, v0, Framer, Cursor) with a track record of shipping production-ready web applications and ML-powered solutions. Seeking full-stack, AI developer, or freelance contract roles.

Technical Skills

Languages: Python, JavaScript (ES6+), Java, SQL, HTML, CSS
Frameworks/Libraries: React.js, Node.js, Express.js, Flask, LangChain, Scikit-learn
Databases: MongoDB, MySQL, Pinecone Vector DB
Tools: Git, GitHub, VS Code, Streamlit, Power BI, Google Colab
Concepts: Machine Learning, Data Visualization, API Integration, AI Agents, Cloud Deployment

Experience

IBM	2025 – Present
<i>Quality Assurance Engineer</i>	<i>Pune, India</i>
- Executed functional, regression, and integration testing on enterprise software, ensuring zero critical defects in production releases. - Developed and maintained test plans, test cases, and defect reports using industry-standard QA methodologies. - Collaborated with cross-functional engineering teams in an Agile/Scrum environment to meet sprint delivery goals. - Utilized JIRA for defect tracking and CI/CD pipeline monitoring to validate build quality across release cycles.	
WebNCraft	2024
<i>Full-Stack Developer · Freelance</i>	<i>Remote</i>
- Developed and deployed 7+ MERN stack applications integrating AI-based automation features. - Designed RESTful APIs and CI/CD pipelines, reducing deployment time by 30%. - Built responsive UIs using React.js with clean, scalable component-based architecture. - Achieved 9.5/10 client satisfaction with zero post-launch critical bugs across all deliverables.	

Projects

Pune Metro Feeder Bus Route Optimization <i>Python, K-Means, Dijkstra, Google OR-Tools, GeoPandas, Folium</i>	2025
- Optimized feeder bus routes using K-Means clustering & Dijkstra's algorithm to minimize passenger travel time. - Applied VRP (Vehicle Routing Problem) via Google OR-Tools, reducing route cost by 22%. - Processed real-time GIS data with GeoPandas & Folium for interactive, scalable route mapping.	
AI Agent for Business & Finance Automation <i>LangChain, GPT-4, ARIMA, Prophet, Pinecone, Streamlit</i>	2025
- Engineered an AI agent using LangChain + GPT-4 to automate financial analysis and reporting workflows. - Integrated ARIMA & Prophet forecasting models achieving 92% time-series accuracy. - Built RAG pipeline with Pinecone Vector DB and a Streamlit dashboard for real-time analytics.	

Education

Sandip University	2025
<i>Bachelor of Computer Applications (BCA) · Computer Science</i>	<i>Nashik, India</i>

Achievements

- NASA Space Apps Challenge 2024:** Competed in global hackathon focused on Earth data visualization and space innovation.
- UI/UX Design Excellence Award:** Recognized at campus innovation showcase for outstanding interface design.
- Salary Prediction via Linear Regression:** Built and evaluated regression model predicting compensation from experience data.
